Art Unit: 1791

***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-7, drawn to a process of making a fiber batt.

Group II, claim(s) 8 and 9, drawn to a process of controlling areal density and volumetric density of a fiber batt.

Group III, claim(s) 10-28, drawn to an apparatus for making a fiber batt.

2. The inventions listed as Groups I - III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The technical feature of Group I is a process of making a fiber batt by contacting a fiber with at least one additional flowing stream of gas. The technical feature of Group II is a process of controlling areal density and volumetric density by varying the speed of a fiber collecting surface. The technical feature of Group III is an apparatus for making a fiber batt having a defined positioning of a venturi and a diffuser. Also, the claims are unpatentable over at least Geus et al (U.S. Patent 5,766,646 A, cited in the search report). Since the claimed limitations fail to define a contribution over Geus et al, the claims fail to constitute a special technical feature and hence, there is lack of unity between the cited claims.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

Art Unit: 1791

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
